Independent auditors' report on review of consolidated interim financial statements

To the Board of Directors of Aktif Yatırım Bankası Anonim Şirketi:

Introduction

We have reviewed the accompanying consolidated statement of financial position of Aktif Yatırım Bankası Anonim Şirketi ("the Bank") and its subsidiaries (collectively "the Group") as at 30 June 2009 and the consolidated statements of comprehensive income, changes in equity and cash flows for the six-month period then ended, and notes, comprising a summary of significant accounting policies and other explanatory information ("the consolidated interim financial statements"). Management is responsible for the preparation and presentation of this consolidated interim financial information in accordance with International Financial Reporting Standard IAS 34 Interim Financial Reporting. Our responsibility is to express a conclusion on this consolidated interim financial information based on our review.

Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410 Review of Interim Financial Information Performed by the Independent Auditor of the Entity. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for qualified conclusion

The Group has for the first time presented the consolidated interim financial statements in accordance with IAS 34, "Interim Financial Reporting" as of 30 June 2009, therefore it did not prepare the comparative consolidated statements of comprehensive income, changes in equity and cash flows for the six month period ended 30 June 2008. Presentation of comparative financial statements is required by International Accounting Standard No. 1 "Presentation of Financial Statements".

Qualified conclusion

Based on our review, except that the omission of comparative consolidated statements of comprehensive income, changes in equity and cash flows for the six month period ended 30 June 2008 results in an incomplete presentation as described in the Basis for Qualified Conclusion paragraph, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial statements do not give a true and fair view of the financial position of the entity as at 30 June 2009, and of its financial performance and its cash flows for the six month period then ended in accordance with IAS 34, 'Interim Financial Reporting'.

Emphasis of matter

Without further qualifying our conclusion, we draw attention to the following matter:

a) The Bank has given the significant portion of cash and non-cash loans to its related parties (Çalık Group Companies) as of balance sheet date.

31 July 2009 Istanbul, Turkey

Rearb Alus Baginson Denether ve SMMA AS

Akis Bağımsız Denetim ve Serbest Muhasebeci Mali Müşavirlik A.Ş., a Turkish corporation and a member firm of the KPMG network of independent member firms affiliated with KPMG International, a Swiss cooperative.

(Currency - In thousands of Turkish Lira ("TL"))

1. Corporate information

Aktif Yatırım Bankası Anonim Şirketi (the "Bank") was incorporated under the name of Çalık Yatırım Bankası A.Ş. in Turkey in July 1999. The Bank changed its name as Aktif Yatırım Bankası A.Ş. on 1 August 2008.

The Bank operates as an "investment bank" and is mainly involved in corporate services such as cash or non-cash, financial leasing, factoring, corporate lending. As an investment bank, the Bank borrows funds from other banks, financial markets, partners and credit customers, but is not entitled to receive deposits from customers.

The head office of the Bank is located at Büyükdere Cad. No: 163 Zincirlikuyu / Istanbul, and the Bank has also two branches in Istanbul.

On 8 May 2008, the Bank has established Çalık Yönetim Sistemleri A.Ş. ("ÇYS") with a 75% of ownership. ÇYS provides consultancy services in the issues of the evaluation, organisation and restructuring of the general management of the companies established or to be established, the alteration, project and quality management thereof, the strategic planning and the preparation of the feasibilities related thereto, the management of company systems, reduction of costs and company management, industrial relations, manpower planning, production management, productivity, strategic decisions, information technology, financial, accounting and commercial matters, human resources, acquisitions and mergers, quality development, risk management, information technology management and evaluation, as well as preparing computer software and databases regarding these issues.

On 30 May 2008, ÇYS acquired 100% of E-Kent Elektronik Ücret Toplama A.Ş. ("E-Kent") which was established in 2002 to TL 17,000 (see Note 6). E-Kent is a provider of high-technology solutions and services for modern urban management. E-Kent sells, installs and operates electronic fare collection solutions and electronic payment systems, and provides consulting services for planning and efficiency of public transport services. E-Kent is an electronic fare collection operating company, and currently operates services in four provinces of Turkey. E-Kent has tailored its systems to meet the individual customer requirements of various railway networks, municipalities, public transport companies, car parks, cultural parks, zoos and museums located in major cities in Turkey. E-Kent is a member of the International Association of Public Transport (UITP). E-Kent has 98% of ownership in E-Tik Elektronik Transfer Kup. Ltd. Şti. ("E-Tik").

The Bank and its consolidated subsidiaries are referred as the "Group" hereafter.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

1. Corporate information (continued)

The Bank has cooperation with Çalık Holding A.Ş. in their project of investing a foreign oriented bank in Çalık Finansal Hizmetler A.Ş. The share of the Bank in this company is 24%.

The main establishment purpose of Çalık Finansal Hizmetler A.Ş. is the transactions related with purchase of Bank Kombatare Tregtare in Albania.

The subsidiaries included in consolidation and effective shareholding percentages of the Group at 30 June 2009 and 31 December 2008 are as follows:

| | Place of incorporation | Effective sh and voting | 0 |
|-------------------------------|---------------------------|----------------------------|---------------------|
| | | 30 June 2009 | 31 December 2008 |
| ÇYS | Turkey | 75.0 | 75.0 |
| E-Kent | Turkey | 75.0 | 75.0 |
| E-Tik | Turkey | 73.5 | 73.5 |
| Çalık Finansal Hizmetler A.Ş. | Turkey | 24.0 | 24.0 |

ÇYS has been established with TL 3,000 of registered capital. The share capital is registered to the Bank and GAP İnşaat Yatırım ve Dış Ticaret A.Ş. ("GAP İnşaat") with shareholding percentage of 75% and 25%, respectively. As at 30 June 2009, TL 753 of capital commitments has not been paid by GAP İnşaat.

The Bank employs 208 people as of 30 June 2009 (31 December 2008 – 160).

2. Basis of preparation

2.1 Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS).

The Bank maintains its books of account and prepares its statutory financial statements in accordance with Turkish Accounting Standards, Financial Reporting Standards and other regulations on accounting and reporting standards promulgated by the Banking Regulation and Supervision Agency ("BRSA"). The consolidated subsidiaries maintain their books of account and prepare their statutory financial statements in accordance with the regulations of Turkish Commercial Code and Tax Legislation.

The consolidated financial statements have been prepared from statutory financial statements of the Bank and its subsidiaries and presented in accordance with IFRS in Turkish Lira ("TL") with adjustments and certain reclassifications for the purpose of fair presentation in accordance with IFRS.

The accompanying consolidated financial statements as of 30 June 2009 are authorised for issue by the management on 31 July 2009. The General Assembly and certain regulatory bodies have the power to amend the statutory financial statements after issue.

2.2 Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis except for the following:

- derivative financial instruments are measured at fair value
- financial instruments at fair value through profit or loss are measured at fair value
- available-for-sale financial instruments.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

2. **Basis of preparation** (continued)

2.3 Functional and presentation currency

These consolidated financial statements are presented in TL, which is the Group's functional currency. Except as indicated, financial information presented in TL has been rounded to the nearest thousand.

2.4 Use of estimates and judgements

The preparation of the consolidated financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amount recognised in the consolidated financial statements are as follows;

Key sources of estimation uncertainty

Allowances for credit losses

The Bank reviews its loan portfolio to assess impairment at least on a quarterly basis. In determining whether an impairment loss should be recorded in the income statement, the Bank makes judgements as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans and individual loans. All loans with principal and/or interest overdue for more than 90 days are considered as impaired and individually assessed. Other evidence for impairment may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or national or local economic conditions that correlate with defaults on assets in the Bank. Impairment and uncollectibility are measured and recognised individually for loans and receivables.

Determining fair values

The fair values of financial instruments that are not quoted in active markets are determined by using valuation techniques. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the Bank uses that technique. To the extent practical, models use only observable data; however areas such as credit risk, volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect reported fair value of financial instruments.

Critical accounting judgements in applying the Bank's accounting policies

Critical accounting judgements made in applying the Bank's accounting policies include:

Financial asset and liability classification

The Bank's accounting policies provide scope for assets and liabilities to be designated on inception into different accounting categories in certain circumstances:

In classifying financial assets and liabilities as "trading", the Bank has determined that it meets the description of trading assets and liabilities set out in accounting policy 3.13.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

2. Basis of preparation (continued)

2.5 Change in accounting policies

Presentation of financial statements

The Group applied revised IAS 1 Presentation of Financial Statements (2007), which became effective as of 1 January 2009. As a result, the Group presents in the statement of changes in equity all owner changes in equity, whereas all non-owner changes in equity are presented in the statement of comprehensive income. Comparative information has been re-presented so that it also is in conformity with the revised standard. The change in accounting policy only impacts presentation aspects.

3. Significant accounting policies

3.1 Accounting in hyperinflationary economies

The financial statements of the Turkish entities have been restated for the changes in the general purchasing power of the Turkish Lira based on International Accounting Standard ("IAS") No. 29 "Financial Reporting in Hyperinflationary Economies" as of 31 December 2005. IAS 29 requires that financial statements prepared in the currency of a hyperinflationary economy be stated in terms of the measuring unit current on the balance sheet date, and that corresponding figures for prior periods be restated in the same terms. One characteristic that necessitates the application of IAS 29 is a cumulative three-year inflation rate approaching or exceeding 100%. The cumulative three-year inflation rate approaching or exceeding 100%. The cumulative three-year inflation rate approaching or exceeding 100%. The cumulative three-year inflation rate approaching or exceeding 100%. The cumulative three-year inflation rate approaching or exceeding 100%. The cumulative three-year inflation rate in Turkey has been 35.61% as of 31 December 2005, based on the Turkish nation-wide wholesale price indices announced by the Turkish Statistical Institute ("TURKSTAT"). By taking this into consideration, together with the sustained positive trend in quantitative factors, such as the stabilisation in financial and monetary markets, decrease in interest rates and the appreciation of TL against USD and other hard currencies, it was declared that Turkey should be considered a non-hyperinflationary economy under IAS 29 from 1 January 2006 as stated in International Standards Alert No. 2006/17 issued on 8 March 2006. Therefore, IAS 29 has not been applied to the accompanying financial statements starting from 1 January 2006.

3.2 Basis of consolidation

(i) Subsidiaries

Subsidiaries are entities controlled by the Group. Control exists when the Group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that presently are exercisable are taken into account. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Group. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the income statement (Note 3.19).

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

3. Significant accounting policies (continued)

3.2 Basis of consolidation

(ii) Associate (equity accounted investee)

The Bank's investment in associate is subsidiary for under the equity method of accounting. This is entity in which the Bank has significant influence but not control and which are neither affiliate nor joint ventures of the Bank. The investment in subsidiary is carried in the balance sheet at cost plus post-acquisition changes in the Bank's share of net assets of the subsidiary, less any impairment in value. The income statement reflects the Bank's share of the results of operations of the subsidiary. Where there has been a change recognised directly in the equity of a subsidiary, the Bank recognises its share of any changes and discloses this when applicable, in the statement of changes in equity.

The subsidiary's accounting policies conform to those by the Bank for like transactions and events.

(iii) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intragroup transactions, are eliminated in preparing the consolidated financial statements. Unrealised gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

3.3 Foreign currency transactions

Transactions in foreign currencies are translated to the respective functional currencies of the Group at exchange rates on the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies on the reporting date are retranslated to the functional currency at the exchange rate on that date. Foreign currency differences arising on retranslation are recognised in profit or loss.

Foreign currency translation rates used by the Group are as follows:

| | EUR / TL (full) | USD / TL (full) |
|------------------|--------------------|--------------------|
| 31 December 2008 | 2.1454 | 1.5180 |
| 30 June 2009 | 2.1697 | 1.5374 |

3.4 Interest income / expense

Interest income and expense are recognised in the income statement using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or liability. The effective interest rate is established on initial recognition of the financial asset and liability and is not revised subsequently.

The calculation of the effective interest rate includes all fees and commissions paid or received transaction costs, and discounts or premiums that are integral part of the effective interest rate.

Interest income and expense on all trading assets and liabilities are considered to be incidental to the Group's trading operations and are presented together with all other changes in the fair value of trading assets and liabilities in net trading income.

Interest income and expense presented in the consolidated income statement include the interest income on financial assets and liabilities at amortised cost on an effective interest rate basis.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

3. Significant accounting policies (continued)

3.5 Fees and commission

Fees and commissions income and expenses that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate.

Other fees and commission income are recognised as the related services are provided.

Other fees and commission expense relates mainly to transaction and service fees, which are expensed as the services are received.

3.6 Net trading income

Net trading income comprises gains less loss related to trading assets and liabilities, and includes all realised and unrealised fair value changes and foreign exchange differences.

3.7 Income from fare collection service

(i) Goods sold

Revenue from the sale of goods is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue from the sale of goods is stated net of discounts and returns. Revenue is recognised when the significant risks and rewards of ownership of the goods have passed on to the buyer and the amount of revenue can be measured reliably.

(ii) Commissions

When the Group acts in the capacity of an agent rather than as the principal in a transaction, the revenue recognised is the net amount of commission made by the Group.

(iii) Services

Revenue from services rendered is recognised in profit or loss as the service has been rendered.

3.8 Dividends

Dividend income is recognised when the right to receive income is established.

3.9 Lease payments made

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Contingent lease payments are accounted for by revising the minimum lease payments over the remaining term of the lease when the lease adjustment is confirmed.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

3. Significant accounting policies (continued)

3.10 Income tax expense

Income tax expense comprises current and deferred tax. Income tax expense is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted on the balance sheet date, and any adjustment to tax payable in respect of prior years.

Deferred tax is provided using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed on each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

3.11 Financial assets and liabilities

Recognition

The Group initially recognises trade and other receivables, loans and advances to customers, held-tomaturity investment securities, trade and other payables, funds borrowed and customer accounts on the date that they are originated. Regular way purchases and sales of financial assets are recognised on the trade date at which the Group commits to purchase or sell the asset. All other financial assets and liabilities are initially recognised on the trade date at which the Group becomes a party to the contractual provisions of the instrument.

Derecognition

The Group derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Group is recognised as a separate asset or liability.

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

Offsetting

Financial assets and liabilities are set off and the net amount presented in the balance sheet when, and only when, the Group has a legal right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted by the accounting standards, or for gains and losses arising from a group of similar transactions such as in the Group's trading activity.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

3. Significant accounting policies (continued)

3.11 Financial assets and liabilities (continued)

Amortised cost measurement

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

Fair value measurement

The determination of fair values of financial assets and financial liabilities is based on quoted market prices or dealer price quotations for financial instruments traded in active markets. For all other financial instruments fair value is determined by using valuation techniques. Valuation techniques include net present value techniques, the discounted cash flow method, comparison to similar instruments for which market observable prices exist, and valuation models.

Identification and measurement of impairment

On each balance sheet date, the Group assesses whether there is objective evidence that financial assets not carried at fair value through profit or loss are impaired. Financial assets are impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset, and that the loss event has an impact on the future cash flows on the asset that can be estimated reliably.

Since the Group's loan portfolio does not consist of many transactions, the Group considers evidence of impairment at only specific asset level. All financial assets are assessed for specific impairment.

Objective evidence that a financial asset or group of assets is impaired includes observable data that comes to the attention of the Group about the following loss events

- significant financial difficulty of the issuer or obligor;
- a breach of contract, such as a default or delinquency in interest or principal payments by more than 90 days;
- the Group granting to the borrower, for economic or legal reasons relating to the borrower's financial difficulty, a concession that the lender would not otherwise consider;
- it becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- the disappearance of an active market for that financial asset because of financial difficulties; or
- observable data indicating that there is a measurable decrease in the estimated future cash flows
 from a group of financial assets since the initial recognition of those assets, although the decrease
 cannot yet be identified with the individual financial assets in the Group, including:
 - ➤ adverse changes in the payment status of borrowers; or
 - > national or local economic conditions that correlate with defaults on the assets in the Group.

Impairment losses on assets carried at amortised cost are measured as the difference between the carrying amount of the financial assets and the present value of estimated cash flows discounted at the assets' original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against loans and advances. Interest on the impaired asset continues to be recognised through the unwinding of the discount.

When a subsequent event causes the amount of impairment loss to decrease, the impairment loss is reversed through profit or loss.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

3. Significant accounting policies (continued)

3.12 Cash and cash equivalents

Cash and cash equivalents include cash on hand, unrestricted balances held with Central Bank and highly liquid financial assets with original maturities of less than three months, which are subject to insignificant risk of changes in their fair value, and are used by the Group in the management of its short-term commitments.

When the Group purchases a financial asset and simultaneously enters into an agreement to resell the asset (or a substantially similar asset) at a fixed price on a future date ("reverse repo or stock borrowing"), the arrangement is accounted for as cash and cash equivalents, and the underlying asset is not recognised in the Group's consolidated financial statements.

Cash and cash equivalents are carried at amortised cost in the consolidated balance sheet.

3.13 Trading assets and liabilities

Trading assets and liabilities are those assets and liabilities that the Group acquires or incurs principally for the purpose of selling or repurchasing in the near term, or holds as part of a portfolio that is managed together for short-term profit or position taking.

Trading assets and liabilities are initially recognised and subsequently measured at fair value in the balance sheet with transaction costs taken directly to income statement. All changes in fair value are recognised as part of net trading income in income statement. Trading assets and liabilities are not reclassified subsequent to their initial recognition.

3.14 Trade and other receivables

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

3.15 Inventories

Inventories are stated at the lower of cost or net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

The cost of inventories is determined on weighted average principle and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

3. Significant accounting policies (continued)

3.16 Loans and advances to customers

Loans and advances to customers are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and that the Group does not intend to sell immediately or in the near term.

When the Group is the lessor in a lease agreement that transfers substantially all of the risks and rewards incidental to ownership of an asset to the lessee, the arrangement is presented within loans and advances to customers.

Loans and advances to customers are initially measured at fair value plus incremental direct transaction costs, and subsequently measured at their amortised cost using the effective interest method.

3.17 Investment securities

Investment securities are initially measured at fair value plus, incremental direct transaction costs, and subsequently accounted for depending on their classification as either held-to-maturity or available-for-sale.

(i) Held-to-maturity

Held-to-maturity investments are non-derivative assets with fixed or determinable payments and fixed maturity that the Group has the positive intent and ability to hold to maturity, and which are not designated as at fair value through profit or loss or as available-for-sale.

Held-to-maturity investments are carried at amortised cost using the effective interest method. Any sale or reclassification of a more than insignificant amount of held-to-maturity investments not close to their maturity would result in the reclassification of all held-to-maturity investments as available-for-sale, and prevent the Group from classifying investment securities as held-to-maturity for the current and the following two financial years.

(*ii*) Available-for-sale

Available-for-sale investments are non-derivative investments that are designated as available-for-sale or are not classified as another category of financial assets. Unquoted equity securities whose fair value cannot be reliably measured are carried at cost. All other available-for-sale investments are carried at fair value.

Interest income is recognised in profit or loss using the effective interest method. Dividend income is recognised in profit or loss when the Group becomes entitled to the dividend. Foreign exchange gains or losses on available-for-sale debt security investments except the equity securities are recognised in profit or loss.

Other fair value changes are recognised directly in equity until the investment is sold or impaired, whereupon the cumulative gains and losses previously recognised in equity are recognised in profit or loss.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

3. Significant accounting policies (continued)

3.18 Property and equipment

Recognition and measurement

Items of property and equipment are restated for the effects of inflation to the end of 31 December 2005, less accumulated depreciation and impairment losses. Property equipment acquired after 31 December 2005 is reflected at cost, less accumulated depreciation and impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset.

Subsequent costs

The cost of replacing part of an item of property or equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The costs of the day-to-day servicing of property and equipment are recognised in profit or loss as incurred.

Depreciation

Depreciation is recognised in the income statement on a straight-line basis over the estimated useful lives of each part of an item of property and equipment. Leased assets are depreciated over the shorter of the lease term and their useful lives.

The estimated useful lives for as at 30 June 2009 and 31 December 2008 are as follows:

| • | machinery and equipment | 4-8 years |
|---|-------------------------|------------|
| • | furniture and fixtures | 4-8 years |
| • | motor vehicles | 5 years |
| • | other fixed assets | 4-50 years |

Leasehold improvements are depreciated on a straight-line method over a period of time of their lease contract.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

3. Significant accounting policies (continued)

3.19 Intangible assets

(i) Goodwill

Goodwill (negative goodwill) arises on the acquisition of subsidiaries.

Acquisition

Goodwill represents the excess of the cost of the acquisition over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of the acquiree. When the excess is negative (negative goodwill), it is recognised immediately in profit or loss.

Subsequent measurement

Goodwill is measured at cost less accumulated impairment losses. In respect of equity accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment.

(ii) Service agreements

Service agreements acquired in a business combination are recognised at fair value at the acquisition date. The service agreements have a finite useful life and are carried at cost less accumulated amortisation. Amortisation is calculated using the straight-line method over the expected life of the service agreements.

(iii) Software

Software acquired by the Group is restated for the effects of inflation to the end of 31 December 2005, less accumulated amortisation and impairment losses. Intangible assets acquired after 31 December 2005 are reflected at cost, less accumulated amortisation and impairment losses.

Expenditure on internally developed software is recognised as an asset when the Group is able to demonstrate its intention and ability to complete the development and use the software in a manner that will generate future economic benefits, and can reliably measure the costs to complete the development. The capitalised costs of internally developed software include all costs directly attributable to developing the software, and are amortised over its useful life. Internally developed software is stated at capitalised cost less accumulated amortisation and impairment.

Subsequent expenditure on software assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

Amortisation is recognised in income statement on a straight-line basis over the estimated useful life of the software, from the date that it is available for use. The estimate useful life of software is 3 to 14 years.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

3. Significant accounting policies (continued)

3.20 Leased assets – lessee

Leases in terms of which the Group assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset.

Other leases are operating leases and, the leased assets are not recognised on the Group's balance sheet.

3.21 Impairment of non-financial assets

The carrying amounts of the Group's non-financial assets, other than deferred tax assets, are reviewed on each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset group that generates cash flows that largely are independent from other assets and groups. Impairment losses are recognised in income statement. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a pro rata basis.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

3.22 Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

A provision for restructuring is recognised when the Group has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced publicly. Future operating costs are not provided for.

A provision for onerous contracts is recognised when the expected benefits to be derived by the Group from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Group recognises any impairment loss on the assets associated with that contract.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

3. Significant accounting policies (continued)

3.23 Employee benefits

The Group has both defined benefit and defined contribution plans as described below:

i) Defined benefit plans

In accordance with existing social legislation in Turkey, the Group is required to make lump-sum termination indemnities to each employee who has completed over one year of service with the Group and whose employment is terminated due to retirement or for reasons other than resignation or misconduct.

Such defined benefit plan is unfunded. The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method. All actuarial gains and losses are recognised in the income statement.

ii) Defined contribution plans

For defined contribution plans the Group pays contributions to publicly administered Social Security Funds on a mandatory basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due.

The Group does not have any internally set defined contribution plan.

3.24 Trade and other payables

Trade and other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

3.25 New standards and interpretations not yet adopted

A number of new standards, amendments to standards and interpretations are not yet effective as at and for the six month period ended 30 June 2009, and have not been applied in preparing these financial statements:

• IFRIC 18 clarifies the requirements of IFRSs for agreements in which an entity receives from a customer an item of property, plant, and equipment that the entity must then use either to connect the customer to a network or to provide the customer with ongoing access to a supply of goods or services (such as a supply of electricity, gas or water). In some cases, the entity receives cash from a customer that must be used only to acquire or construct the item of property, plant, and equipment in order to connect the customer to a network or provide the customer with ongoing access to a supply of goods or services (or to do both).

The basic principle of IFRIC 18 is that when the item of property, plant and equipment transferred from a customer meets the definition of an asset under the IASB Framework from the perspective of the recipient, the recipient must recognise the asset in its financial statements. If the customer continues to control the transferred item, the asset definition would not be met even if ownership of the asset is transferred to the utility or other recipient entity.

The deemed cost of that asset is its fair value on the date of the transfer.

IFRIC 18 must be applied prospectively to transfers of assets from customers received on or after 1 July 2009. Earlier application is permitted provided the valuations and other information needed to apply to the Interpretation to past transfers were obtained at the time those transfers were made.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

3. Significant accounting policies (continued)

3.25 New standards and interpretations not yet adopted (continued)

- The amendments to IFRS 5 Non-Current Assets Held for Sale and Discontinued Operations requires an entity which is committed to a sale plan involving loss of control of a subsidiary to classify all the assets and liabilities of that subsidiary as held for sale when the criteria for classification as held for sale in IFRS 5 are met, regardless of whether the entity will retain a non-controlling interest in its former subsidiary after the sale. Relevant disclosure should be made for this subsidiary if the definition of a discontinued operation is met. A consequential amendment to IFRS 1 First-time Adoption of International Financial Reporting Standards states that these amendments are applied prospectively from the date of transition to IFRSs. The amendment is effective for annual periods beginning on or after 1 July 2009, although entities are permitted to adopt them earlier if the amendments to IAS 27 Consolidated and Separate Financial Statements also are applied, is not expected to have any impact on the financial statements of the Group.
- IASB has completed the second phase of its business combinations project by issuing a revised version of IFRS 3 Business Combinations and an amended version of IAS 27 Consolidated and Separate Financial Statements which also brings revisions to IAS 28 Investments in Associates and IAS 31 Interest in Joint Ventures.

Accordingly, the acquirer can elect to measure any non-controlling (minority) interest at:

- fair value at the date of acquisition, which means that goodwill includes a portion attributable to the non-controlling interests; or

- its proportionate interest in the fair value of the identifiable assets and liabilities of the acquiree, which means that goodwill relates only to the controlling interest acquired by the parent.

This election is made on a transaction-by-transaction basis.

The new requirements take effect on 1 July 2009, although entities are permitted to adopt them earlier, is not expected to have any impact on the financial statements of the Group.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

4. Financial risk management

Introduction and overview

The Group has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- market risks
- operational risks.

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital.

Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The Board has established the Audit Committee and Risk Management Department, which are responsible for developing and monitoring Group risk management policies in their specified areas. The Audit Committee has non-executive members and report regularly to the Board of Directors on their activities.

The Bank's risk management policies are established to identify and analyse the risks faced by the Bank, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions, products and services offered. The Bank, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment, in which all employees understand their roles and obligations.

The Audit Committee is responsible for monitoring compliance with the Bank's risk management policies and procedures, and for reviewing the adequacy of the risk management framework in relation to the risks faced by the Bank. The Audit Committee is assisted in these functions by Internal Audit. Internal Audit undertakes both regular and ad-hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

Credit risk

Credit risk is the risk of financial loss to the Bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Bank's loans and advances to customers and other banks and investment securities. For risk management reporting purposes, the Bank considers and consolidates all elements of credit risk exposure (such as individual obligor default risk, country and sector risk).

For risk management purposes, credit risk arising on trading securities is managed independently, but reported as a component of market risk exposure.

Management of credit risk

The Bank's credit risk management strategy is based on a three-part methodology that embraces the customer selection, credit allocation, and credit pricing stages. Since it was founded, the Bank has always managed its credit risks by taking a portfolio-logic approach. This sums up the Bank's basic risk management strategy.

In the first stage of the lending process, sectoral weightings are determined and firms that are seeking credit are given a preliminary screening. This initial check is followed by the credit allocation stage in which firms are individually rated and the Bank's guarantee strategy is determined according to the results of this rating. In the final stage of the lending process, prices are determined by taking a risk-premium approach.

Impaired loans and advances to customers, trade and other receivables and investment securities

Impaired loans and advances to customers, trade and other receivables and investment debt securities are those for which the Group determines that it is probable that it will be unable to collect all principal and interest due to according to the contractual terms of the loans, receivables and investment debt securities.

Allowance for impairment

The Group establishes an allowance for impairment losses on assets carried at amortised cost that represents its estimate of incurred losses in its loan, receivable and investment debt security portfolio. This allowance is a specific loss component that relates to individually significant exposures.

Write-off policy

The Group writes off a loan, receivable or investment debt security balance, and any related allowances for impairment losses, when Group determines that the loan, receivable or security is uncollectible. This determination is reached after considering information such as occurrence of significant changes in the borrower's / issuer's financial position such that the borrower / issuer can no longer pay the obligation, or that proceeds from collateral will not be sufficient to pay back the entire exposure.

Set out below is an analysis of the gross and net (of allowances for impairment) amounts of individually impaired assets by risk grade.

| | | Trade and other receivables | | Loans and advances to customers | | Investment debt securities - HTM | |

(Currency - In thousands of Turkish Lira ("TL"))

4. Financial risk management (continued)

Credit risk (continued)

The Bank holds collateral against loans and advances to customers in the form of mortgage interests over property, other registered securities over assets, and guarantees.

| Cash loans | 30 June 2009 | 31 December 2008 |
|---------------------------------------|---------------------|------------------|
| Against non-performing loans | - | - |
| Against neither past due nor impaired | | |
| - Pledge on property | 3,260 | 1,822 |
| - Cheques and notes | 15,754 | 42,538 |
| Total | 19,014 | 44,360 |

The Bank also holds collateral against non-cash loans as stated below:

| Non-cash loans | 30 June 2009 | 31 December 2008 |
|--------------------|--------------|------------------|
| Cheques and notes | 2,300 | 13,631 |
| Pledge on property | 14,410 | 5,325 |
| Equity | 440 | 1,588 |
| | 17,150 | 20,544 |

In addition to collaterals stated above, the Bank holds customer sureties amounting to TL 53,437 (31 December 2008 – TL 41,435) against its cash loans and advances to customers and TL 89,056 (31 December 2008 – TL 134,049) against its non-cash loans.

Concentration risk by sector

The Bank monitors concentrations of credit risk for cash loans and advances to customers by sector. An analysis of concentrations of credit risk at the reporting date is shown below:

| | 30 June 2009 |) | 31 December 2 | 2008 |
|----------------------------------|--------------|-----|---------------|------|
| | Carrying | | Carrying | |

4. Financial risk management (continued)

Credit risk (continued)

Concentration risk by sector (continued)

An analysis of concentrations of credit risk for non-cash loans to customers at the reporting date is shown below:

| | 30 June 2009 | | 31 December | 2008 |
|----------------------------------|--------------|-----|-------------|------|
| | Carrying | | Carrying | |
| Sector | amount | % | amount | % |
| Manufacturing | 129,382 | 30 | 75,601 | 22 |
| Energy | 107,726 | 25 | 12,747 | 4 |
| Construction | 85,848 | 20 | 53,242 | 15 |
| Trade | 39,925 | 9 | 35,718 | 10 |
| Media | 24,930 | 6 | - | - |
| Financial institutions | 6,560 | 1 | 7,750 | 2 |
| Transportation and communication | - | - | 10,600 | 3 |
| Real estate | - | - | 78,148 | 22 |
| Other | 42,979 | 9 | 76,798 | 22 |
| | 437,350 | 100 | 350,604 | 100 |

Trade and other receivables are due from several private sector companies and city municipalities. Investment securities (held-to-maturity portfolio) are corporate bonds.

Concentration risk by location

The Group's total risk for loans and advances to customers, trade and other receivables and investment debt securities (held-to-maturity portfolio) is concentrated on Turkey.

Trading assets and investment securities (available-for-sale portfolio)

The Group held trading assets, investment securities (available-for-sale portfolio) including derivative assets of TL 43,109 (31 December 2008: TL 48,628). An analysis of the credit quality of the maximum credit exposure is as follows:

| | Note | 30 June 2009 | 31 December 2008 |
|-------------------------------------------------|------|-----------------|------------------|
| Government bonds and treasury bills | | | |

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

4. Financial risk management (continued)

Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting obligations from its financial liabilities.

Management of liquidity risk

The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group funds its short-term liquidity with interbank. In the case of long-term liquidity need, the Bank utilises capital market instruments. Additionally, the Bank also funds itself from the domestic market when it needs additional funds.

Exposure to liquidity risk

The key measure used by the Bank for managing liquidity risk is the ratio of net liquid assets to shortterm funds borrowed. For this purpose net liquid assets are considered as including cash and cash equivalents and trading debt securities for which there is an active and liquid market less any shortterm funds borrowed and commitments. A similar, but not identical, calculation is used to measure the Bank's compliance with the liquidity limit established by the BRSA.

^(*) Included in other liabilities.

The gross nominal inflow / (outflow) disclosed in the table above is the contractual, undiscounted cash flow on the financial liability or commitment.

Market risk

Market risk is the risk that, measured by changes in market prices, such as interest rate, equity prices, foreign exchange rates and credit spreads (not relating to changes in the obligor's / issuer's credit standing) which will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

Overall authority for market risk is vested in Asset and Liability Committee ("ALCO").

Exposure to market risks – trading portfolios

The principal tool used to measure and control market risk exposure within the Bank's trading portfolios is Standard Method.

A summary of the Standard Method position of the Group's trading portfolios on 30 June 2009 and 31 December 2008 and during the period is as follows:

| | At the end of | | | |
|-----------------------|-----------------|---------|---------|---------|
| | the period/year | Average | Maximum | Minimum |
| 30 June 2009 | | | | |
| Foreign currency risk | 975 | 80 | 143 | 30 |
| Interest rate risk | 14,925 | 1,210 | 1,287 | 1,138 |

(Currency - In thousands of Turkish Lira ("TL"))

4. Financial risk management (continued)

Market risk (continued)

Exposure to interest rate risk – non-trading portfolios

The principal risk to which non-trading portfolios are exposed is the risk of loss from fluctuations in the future cash flows or fair values of financial instrument because of a change in market interest rates. Interest rate risk is managed principally through monitoring interest rate gaps and by having preapproved limits for repricing bands. The ALCO is the monitoring body for compliance with these limits and is assisted by Risk Management Department of the Bank in its day-to-day monitoring activities. A summary of the Group's interest rate gap position on non-trading portfolios is as follows:

| | Note | Carrying amount | Unallo- cated | On demand | Less than 3 months | 3-6 months | 6-12 months | 1-5 years | More than 5 years |

(Currency - In thousands of Turkish Lira ("TL"))

4. Financial risk management (continued)

Market risk (continued)

Interest rate sensitivity

The management of interest rate risk against interest rate gap limits is supplemented by monitoring the sensitivity of the Bank's financial assets and liabilities to various standard and non-standard interest rate scenarios. Standard scenarios that are considered on a monthly basis include a 100 basis point (bp) parallel fall or rise in all yield curves. An analysis of the Group's sensitivity to an increase or decrease in market interest rates (assuming no asymmetrical movement in yield curves and a constant balance sheet position) is as follows:

| | Profit | or loss | Equit | ty |
|--------------------------------------------|--------------------------------|--------------------------------|--------------------------------|--------------------------------|
| At 30 June 2009 | 100 bp parallel increase | 100 bp parallel decrease | 100 bp parallel increase | 100 bp parallel decrease |

(Currency - In thousands of Turkish Lira ("TL"))

4. Financial risk management (continued)

Operational risk

Operational risk is the risk of loss arising from systems failure, human error, fraud or external events. When controls fail to perform, operational risks can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. The Bank cannot expect to eliminate all operational risks, but through a control framework and by monitoring and responding to potential risks, the Bank is able to manage the risks. Controls include effective segregation of duties, access, authorisation and reconciliation procedures, staff education and assessment processes, including the use of audit.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

4. Financial risk management (continued)

Foreign currency risk (continued)

The following major exchange rates applied during the period ended 30 June 2009 and 31 December 2008:

| | Averag | ge rate | Balanc | e sheet date |
|------|--------|---------|---------|--------------|
| | | | 30 June | 31 December |
| TL | 2009 | 2008 | 2009 | 2008 |
| | | | | |
| USD | 1.6145 | 1.2976 | 1.5374 | 1.5180 |
| Euro | 2.1500 | 1.8949 | 2.1697 | 2.1454 |

Sensitivity analysis

A 10 percent weakening of TL against the foreign currencies on 30 June 2009 and 31 December 2008 would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant.

| 30 June 2009 | Equity | Profit or loss |
|------------------|---------|-----------------------|
| | | |
| Euro | (1,358) | (1,358) |
| USD | (206) | 92 |
| Other currencies | 13 | 13 |
| | (1,551) | (1,253) |
| 31 December 2008 | Equity | Profit or loss |
| | | |
| Euro | 120 | 120 |
| USD | 85 | 176 |
| Other currencies | (139) | (139) |
| | 66 | 157 |

A 10 percent strengthening of the TL against the foreign currencies on 30 June 2009 and 31 December 2008 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

Capital management

The Bank's lead regulator, BRSA sets and monitors capital requirements for the Bank as a whole.

In implementing current capital requirements of BRSA requires the Bank to maintain an 8% ratio of total capital to total risk-weighted assets.

As of 30 June 2009, the Bank's capital adequacy ratio is 25.92% (31 December 2008 – 35.64%).

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

5. Financial assets and liabilities

Accounting classification and fair values

The determination of fair values of financial assets and financial liabilities is based on quoted market prices or dealer price quotations for financial instruments traded in active markets or valuation techniques. However, the Group expects no significant difference between the fair value and carrying value of the financial instruments below since most of the financial instruments' maturies are short-term.

The table below sets out the Group's classification of each class of financial assets and liabilities and their fair values.

| | Note | Trading | Loans and receivables | Available -for-sale | Held–to- maturity | Other amortised cost | Total carrying amount | Fair value |
|------------------------------------------------------|------|---------|-----------------------|------------------------|----------------------|----------------------------|-----------------------------|------------|
| 30 June 2009 | | | | | | | | |
| Cash and cash equivalents | 14 | - | 25,154 | - | - | - | 25,154 | 25,154 |
| Reserve deposits at Central Bank | 15 | - | 5,258 | - | - | - | 5,258 | 5,258 |
| Trading assets | 16 | 1,391 | - · | - | - | - | 1,391 | 1,391 |
| Trade and other receivables Loans and advances to | 17 | - | 1,296 | - | - | - | 1,296 | 1,296 |
| customers | 19 | - | 220,396 | - | - | - | 220,396 | 220,396 |
| Investment securities - AFS | 20 | - | - | 41,718 | - | - | 41,718 | 41,718 |
| Investment securities - HTM | 20 | - | - | - | 2,538 | - | 2,538 | 1,544 |

6. Acquisition of subsidiary

On 30 May 2008, the Bank's subsidiary, ÇYS acquired all of the shares in E-Kent for TL 17,000 in cash.

E-Kent is a provider of high-technology solutions and services for modern urban management. E-Kent sells, installs and operates electronic fare collection solutions and electronic payment systems, and provides consulting services for planning and efficiency of public transport services. E-Kent is an electronic fare collection operating company, and currently operates services in four provinces of Turkey. E-Kent has tailored its systems to meet the individual customer requirements of various railway networks, municipalities, public transport companies, car parks, cultural parks, zoos and museums located in major cities in Turkey.

13. Taxation

General information

The Group is subject to taxation in accordance with the tax procedures and the legislation effective in Turkey.

In Turkey, effective from 1 January 2006 corporate tax rate is 20%. The tax legislation provides for a temporary tax of 20% to be calculated and paid based on earnings generated for each quarter. The amounts which are calculated and paid are offset against the final corporate tax liability for the year.

Corporate tax losses can be carried forward for a maximum period of five years following the year in which the losses were incurred. The tax authorities can inspect tax returns and the related accounting records for a retrospective maximum period of five years. Corporate tax returns are required to be filed by the twenty-fifth day of the fourth month following the year-end balance sheet date and taxes must be paid in one instalment by the end of the fourth month.

Notes To The Consolidated Financial Statements

As Of and For The Six Month Period Ended 30 June 2009

(Currency - In thousands of Turkish Lira ("TL"))

13. Taxation (continued)

As of 30 June 2009 and 31 December 2008, the current tax liability is as follows:

| | 30 June 2009 | 31 December 2008 |
|----------------------------------------|---------------------|-------------------------|
| Income tax liability | 620 | 188 |
| Prepaid taxes | (168) | (353) |
| (Prepaid taxes) / Income taxes payable | 452 | (165) |

As of 30 June 2009, since the income tax liability and prepaid taxes result from different consolidated entities, income tax liability amounting to TL 620 is presented in "Current tax liabilities" and prepaid taxes amounting to TL 168 is presented in "Other assets" separately.

For the period ended 30 June 2009, the income tax expense recognised in comprehensive income statement and income tax recognised directly in equity are as follows:

Recognised in income statement

| 30 June 2009 |
|---------------------|
| (1,209) |
| 170 |
| (119) |
| 289 |
| |

| Other | 295 | - | 295 | 46 | - | 46 |
| Deferred tax assets / (liabilities) | 1,699 | (3,293) | (1,594) | 465 | (2,859) | (2,394) |

Reflected in the consolidated balance sheet as follows:

| | 30 June 2009 | 31 December 2008 |
|------------------------------------------------|--------------|------------------|
| Deferred tax assets | 526 | 230 |
| Deferred tax liabilities | (2,120) | (2,624) |
| | (1,594) | (2,394) |
| | (1,574) | (2,0)1) |
| Unrecognised deferred tax assets | (1,074) | (2,0>1) |
| Unrecognised deferred tax assets | 30 June 2009 | 31 December 2008 |
| Unrecognised deferred tax assets Tax losses | | |

The tax losses relate to ÇYS and expire in 2013. Deferred tax assets have not been recognised in respect of these losses because it is not probable that future taxable profit will be available against which ÇYS can utilise the benefits therefrom.

| | 5,258 | 4,897 |

According to the regulations of the Central Bank of Turkish Republic (the "Central Bank"). The banks are obliged to reserve a portion of certain liability accounts as specified in the related decree. Such mandatory reserves are not available for use in the Group's day to day operations.

The banks operating in Turkey keep reserve deposits for Turkish currency and foreign currency liabilities in TL and USD or EUR at the rates of 6% and 9%, respectively as per the Communiqué no. 2005/1 "Reserve Deposits" of the Central Bank of Turkey (31 December 2008 - 6% for TL and 9% for USD or EUR).

As of 30 June 2009, the interest rates applied for TL reserve deposits by the Central Bank are 7.00% for TL reserve deposits (31 December 2008 – 12.00% for TL). As of 30 June 2009 and 31 December 2008, foreign currency reserve deposits are non-interest earning.

28. Provisions (continued)

Employee termination benefits

In accordance with existing social legislation in Turkey, the Group is required to make lump-sum payments to employees whose employment is terminated due to retirement or for reasons other than resignation or misconduct. In Turkey, such payments are calculated on the basis of 30 days' pay (limited to a maximum of TL 2.26 and TL 2.18 on 30 June 2009 and 31 December 2008, respectively) per year of employment at the rate of pay applicable on the date of retirement or termination. In the financial statements as of 30 June 2009 and 31 December 2008, the Group reflected a liability calculated using the statistical method and based upon factors derived using their experience of personnel terminating their services and being eligible to receive retirement pay and discounted by using the current market yield on government bonds on the balance sheet date.

The principal actuarial assumptions used on the balance sheet dates are as follows:

| | 30 June 2009 | 31 December 2008 |
|-----------------------------------------------------------|--------------|------------------|
| Discount esta | 120/ | 120/ |
| Discount rate Expected rates of salary/limit increases | 12% 6 26% | 12% 6.26% |
| Estimated rate of obtaining right for employee | 0.2070 | 0.2070 |
| termination indemnity | 87% | 87% |

Vacation pay liability

The movement in provision for vacation pay liability is as follows:

| | 30 June 2009 | 31 December 2008 |
|-------------------------------------|--------------|------------------|
| On 1 January | 330 | 49 |
| Effect of acquisition of subsidiary | - | 52 |
| Increase during the period | 188 | 231 |
| Paid | (14) | (2) |
| Balance at the end of the period | 504 | 330 |

29. Other liabilities

| | 30 June 2009 | 31 December 2008 |
|-----------------------------------------|---------------------|------------------|
| Customer accounts | 38,298 | 10,589 |
| Transitory accounts | 1,824 | 285 |
| Taxes and due payable | 1,822 | 973 |
| Payables to Clearing House | 561 | 1,576 |
| Payables to compulsory government funds | 115 | 85 |
| Other | 2,554 | 376 |
| | 45,174 | 13,884 |

The Bank is not entitled to collect deposits. Current accounts represent the current balances of loan customers.

| Total paid-in-capital | 114,000 | 100.00 | 114,000 | 100.00 |
| Restatement effect | 24,663 | | 24,663 | |
| Total share capital | 138,663 | | 138,663 | |

Reserves

Fair value reserve

This reserve includes the cumulative net change in the fair value of available-for-sale investment securities until the investment is derecognised or impaired.

Other reserves

Other reserves consist of legal reserves. The legal reserves consist of first and second legal reserves in accordance with the Turkish Commercial Code. The first legal reserve is appropriated out of the statutory profits at the rate of 5%, until the total reserve reaches a maximum of 20% of the entity's share capital. The second legal reserve is appropriated at the rate of 10% of all distributions in excess of 5% of the entity's share capital. The first and second legal reserves are not available for distribution unless they exceed 50% of the share capital, but may be used to absorb losses in the event that the general reserve is exhausted.
